Eccentric Orbits : The Iridium Storyby John Bloom. Overview -. In the early 1990s, Motorola, the legendary American technology company developed a revolutionary satellite system called Iridium that promised to be its crowning achievement. Light years ahead of anything previously put into space, and built on technology developed for Ronald Reagan's "Star Wars," Iridium's constellation of 66 satellites in polar orbit meant that no matter where you were on Earth, at least one satellite was ...
