Dr. Scherer's "Portfolio Construction and Risk Budgeting" book is a unique blend of rigor and relevance, undoubtedly due to the particularly rich background of the author in both academia and investment management. Its most attractive feature is perhaps that it very convincingly emphasizes that risk management, defined as the art and science of spending investors' risk and dollar budgets in the most efficient way, is the key source of added-value in investment management.

of risk in asset allocation. We propose a generalized risk budgeting (GRB) approach to portfolio construction. In a GRB portfolio, assets are grouped into possibly over-lapping subsets, and each subset is allocated a prespecified risk budget. Minimum variance, risk parity and risk budgeting portfolios are all special instances of a GRB

Research Paper A generalized risk budgeting approach to ...

We explained the basics of portfolio construction using a risk budgeting approach. It is a portfolio optimization approach that does not consider expected returns but that distributes risk over the different securities. RB is a new approach to investing that looks at where we are allocating risk, rather than our money.

Risk Management for Asset-Management Companies - Risk.net

In a risk budgeting approach, the investor only chooses the risk repartition between assets of the portfolio, without any consideration of returns. In the equal risk contribution (ERC) portfolio, the risk contribution from each portfolio asset is made equal. This portfolio has been extensively studied by Maillard et al. (2010) who had derived several interesting properties. In particular, they have shown that this portfolio is located between minimum variance and equally-weighted portfolios.

Portfolio Construction And Risk Budgeting

What Are Value-at-Risk and Risk Budgeting? It is a truism that portfolio management is about risk and return. Although good returns are difficult to achieve and good risk-adjusted returns can be difficult to identify, the concept and importance of return requires no explanation. Larger returns are preferred to smaller ones. This is true at the
