MySQL/MariaDB users accounts*

...

You can use the same SQL  
SELECT command into a PHP  
function `mysql_query ()`.  
This function is used to  
execute the SQL command and  
then later another PHP  
function `mysql_fetch_array`  
( ) can be used to fetch all  
the selected data. This  
function returns the row as  
an associative array, a  
numeric array, or both.
